## Skills

Specialize in heavy duty and automotive equipment repair and restoration, using different welding and fabrication techniques. Also fluent in reading blueprints and making specialty parts from them.

---

---

## Experience

### Wofford Welding / Foreman

JAN 2024 - March 2025, Roebuck SC

The Foreman of the second shift where we fabricated different assemblies that went into concrete, we also repaired and made concrete forums for pre poured man holes. Another task we had was to repair the inside of concrete trucks and repair heavy equipment such as buckets.

### Spartan Jeep Fabrication / Welder and Fabricator

March 2025 - July 2025, Roebuck SC

Fabricated specialty parts for custom builds, main focus was restoring classic Jeeps and had to weld and fabricate body panels.

### Clemson Baja SAE / Chassis Lead and Head Welder

August 2025 - Current, Clemson SC

Using the experiences of my past two jobs I became the Chassis Lead and Head welder. I design the chassis inside Solidworks and then manufacture the frame within a timely manner.

---

## Education

### Riverside Highschool

August 2021 - May 2025, Greer SC

Completed high school and went to J. Harley Bonds Career Center to earn my Career Readiness certification for welding

### Clemson University / Automotive Engineering

July 2025 - Current, Clemson

Currently a freshman at Clemson University

---

---
